

# Advisory Notice

Date Released: 2022-April-18  
Posted By: Quality Assurance  
Reagents Affected: Any Reagent with **White Cap**; Including Calibrators, Controls, Enzymes, Biotin, Buffer, Neutralizing Buffer, Releasing Reagent,  
Brief Description: Cap Color Change due to Supply Delay/ Shortage  
White to Silver/ Gray

Due to covid-related supply delays from the manufacturer, Monobind has diminished its inventory of White Polypropylene (PP) Caps. Monobind has sourced an alternative Silver/ Gray PP Caps from the same manufacturer which will be used as a replacement.

Please note: This change is only cosmetic, there is no impact on product performance. Monobind is making all efforts to return to white PP caps as soon as possible. The manufacture has indicated that white caps will be available at the end of the month (April 2022). Therefore, this will change will not be long lasting.

Thank you for your understanding as the pandemic has created extraordinary and often unpredictable delays in the supply chain.

In Summary:

| Affected Reagent With White Caps | Change                           | Effective   |
|----------------------------------|----------------------------------|-------------|
| Calibrators                      | White PP Caps to Silver/ Gray PP | Immediately |
| Controls                         | White PP Caps to Silver/ Gray PP | Immediately |
| Enzymes                          | White PP Caps to Silver/ Gray PP | Immediately |
| Biotins                          | White PP Caps to Silver/ Gray PP | Immediately |
| Buffer                           | White PP Caps to Silver/ Gray PP | Immediately |
| Neutralizing Buffer              | White PP Caps to Silver/ Gray PP | Immediately |
| Releasing Reagent                | White PP Caps to Silver/ Gray PP | Immediately |

As an official of the company, I verify this information to be true and correct.

Sincerely, *A Shatola*
