

**IL-6**  
CE

Quick test times | 80 minutes ELISA | 50 minutes CLIA

Quantitative IL-6 tests in human plasma or serum as a marker for inflammation and immune responses related to infection and disease

- ✓ Highly purified, specific monoclonal antibody
- ✓ Excellent sensitivity with detection of 0.9 pg/ml
- ✓ Ready-to-use reagents: no recon or dilution

- ✓ Two-level liquid-control
- ✓ Fast and easy procedure: ambient incubation, no shaking
- ✓ Sample volume of 50µl

*Interleukin-6 (IL-6) is a cytokine produced by various cells to help regulate immune responses and may be indicative in the severity of disease. It also regulates zinc and iron transporters, and chronic elevated levels cause hypoferrremia, anemia and hypozincemia. (See IFU for references)*

## Additional Benefits

- ✓ **HIGH YIELD**  
Only manual method with two-point re-calibration\* allows more patients samples at a lower cost-per-test
- ✓ **EASILY AUTOMATED**  
Adaptable to open systems, including those sold by Monobind
- ✓ **ECONOMICAL**  
Internal quality control, no need to buy any additional components
- ✓ **ORDERED WITH hs-CRP**  
When a patient has signs of an inflammatory condition to help evaluate the systemic severity

\* When used with our Monobind ELISA and CLIA analyzers
